DU360

Inspections of confined, cluttered or indoor places.

DU360

ROAV's are on the verge of revolutionising inspections of hard to reach structures. The DU360 is used for inspections of confined and complex places such as storage tanks and boilers. A protective cage with simultaneous full HD and thermal imagery with adjustable tilt angle make it ideal for our inspectors to access otherwise unreachable places without risks of crash or injury.

As a leader company in non destructive testing, our highly experienced inspectors provide you with comprehensive inspection reports based on accurate visual and thermal data.

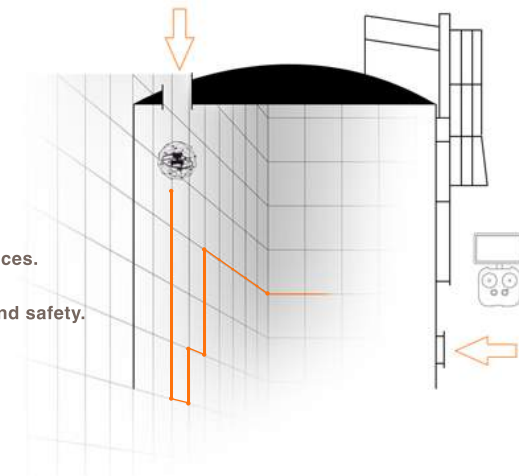

Visual inspection of:

- FPSO's
- Storage tanks
- Boilers
- Pressure vessels

Benefits:

- ✦ Collision tolerant.
- 🔍 Inspect inaccessible spaces.
- 🛡️ Highest level of health and safety.

System	Service	Company
<ul style="list-style-type: none"> ● On board LED lighting for dark spaces. ● Collision-tolerant up to 15 km/h. ● 5km live feed range. ● Fits in <400mm sphere. ● Total take off weight: 700 gram. 	<ul style="list-style-type: none"> ● High definition visual data. ● Thermal imagery. ● Comprehensive reports. ● Onshore and offshore. 	<ul style="list-style-type: none"> ● Leader in Non Destructive Testing and inspection. ● Global representation in 70 countries. ● Highly experienced inspectors. ● +10.000 logged ROAV flights.
