Environmental Inspections

Comprehensive environmental inspection services for regulatory compliance

Applus+ provides **environmental inspection services** and full regulatory environmental site assessments for public and private operations. Our inspections ensure compliance with legal standards for all environmental matrices, including air (*atmospheric emissions, ambient air, fugitive VOCs*), water (*drinking, inland, untreated inland, seawater*), marine sediments, insulating liquids, solid waste and sludge, soil, and noise pollution.

THE Applus+ SOLUTION

Certified environmental inspections across air, water, soil, and noise

Backed by official approvals and certifications, Applus+ delivers **regulated environmental inspection services** in all key environmental domains: atmospheric emissions, air quality, odours, water quality (physical-chemical analysis), macroinvertebrate assessment in waterways and marine sediments, phytoplankton in reservoirs, noise level audits, ground condition analysis, and waste classification.

We tailor every **environmental inspection procedure** to relevant standards and contaminants, ensuring technical accuracy and sector-specific adaptation. Our team includes highly qualified inspectors and a wide network of accredited laboratories for fast, reliable environmental testing results.

Applus+ is accredited as an environmental inspection agency by ENAC under UNE EN ISO 17020 and 17025 criteria, and operates as an authorised control and inspection

body. Our in-house laboratories are ENAC-certified for both chemical and environmental analyses.

Target customers

Target clients for environmental monitoring and compliance

We support companies that generate pollutant emissions or need to meet regulatory obligations. Our **environmental inspection services** are designed for clients who must:

- Demonstrate environmental compliance with local or international laws
- Obtain certificates for corrective or preventive environmental measures
- Classify industrial or hazardous waste
- Conduct inspections of operational installations or production sites

Key customer benefits

Key benefits of Applus+ environmental inspection solutions

- Ensure full compliance with current **environmental regulations** and standards
- Verify infrastructure integrity and the performance of contamination monitoring or filtration systems
- Reduce the risk of environmental incidents through proactive inspection and mitigation
