

Solar Consulting

Applus+ through Enertis provides solar energy consultants to assist its clients throughout all the stages of their solar power plants. From the [project design](#) to its development, construction, [QA/QC](#), and management, the ultimate goal is to ensure maximum profitability and adequate risk management.

The company's highly trained solar PV consultants provide independent and professional solar consultancy to identify the most appropriate solution for each client's needs.

THE Applus+ SOLUTION

Enertis Applus+ team of specialized [solar services](#) and [energy storage](#) consultants has worked on PV projects in more than 65 countries, combining this global expertise in the industry with a deep knowledge of photovoltaic technology. They are committed to their client's success while providing a high-quality service.

Applus+ solar consultancy services include:

- **Bankability studies:** detailed reports to evaluate the reliability of the component manufacturers.
- **Technical due diligence** for solar project financing, in case of ready-to-build projects and for project acquisitions that may be under development, construction, or operation, provides a comprehensive technical review of the solar plants and of the main providers and contractors to assess the potential risks and the proposed strategies to mitigate them.
- **Permitting support** to assist our clients in making sure that solar farms and plants have all the necessary permits for the construction, commissioning, and operation phases.

The company's solar consulting services and processes are accredited by ISO 9001, the world's most popular standard for quality management, which certifies its high-standard services and solutions.

Innovation and RandD are key pillars of its strategy, in line with its mission of providing the best service to its clients, and the firm is always at the forefront of technological development.

Thanks to the innovative Data Science applications and Machine Learning tools that [Enertis Applus+](#) has developed internally, its solar energy consultants can efficiently assist and guide their clients in their decision-making processes to maximize the return on investment of their solar farms and PV projects.

Target customers

Applus+ provides solar consulting services for developers, sponsors, owners, investors, and other parties involved across all phases of a solar PV project life-cycle, namely:

1. Pre-planning
2. Planning and development
3. Implementation and construction
4. Operation and asset management

Ensuring high quality in all these stages is key to the long-term success of each project and Applus+ consultants are there to make sure that their clients meet their goals

Key customer benefits

With its tailored solar consulting services, Applus+ clients benefit from specialized and independent advice across all phases of solar energy projects, from the design to the operation stages. The company's consulting experts identify the best solutions that suit their client's needs, ensuring adequate risk management and the maximum profitability of their solar power plants and assets, optimizing their time and expense.
