

# Environmental Monitoring Network

Environmental-monitoring services comprise the supply, installation, maintenance and calibration of environmental-monitoring equipment for all types of activities involving the atmosphere, water and/or noise.

## NUESTRA SOLUCIÓN

Applus+ provides integrated environmental-monitoring services and equipment tailored to the specific needs of each client. We supply, install, maintain and calibrate all types of atmospheric-monitoring equipment (stack emissions, air quality, meteorology, etc.), water-monitoring equipment and noise-monitoring equipment.

We have a large team of highly qualified and experienced technicians, based all around the world, and our own, customised software packages to collect and manage the resulting data.

## Cientes

This service is aimed at any public or private organisations generating pollutant emissions; in particular, those that wish to demonstrate their compliance with environmental legislation or control their process parameters.

## Beneficios

Using Applus+ to provide environmental-monitoring services ensures that a client:

- Complies with all current environmental legislation

Contacto: [info@applus.com](mailto:info@applus.com)

- Verifies the condition of their installations and contamination-monitoring systems and purifiers. This enables proactive remedial action to be taken when required, leading to cost savings and enhanced productivity
- Reduces their environmental risks
