

SALEM – Environmental Technical-legal Services

SALEM is an Applus+ online service that identifies, assesses and updates a list of client-relevant legislation, providing legislative criteria and solutions. The tool can be customised according to the client's specific business activity and field of work.

THE Applus+ SOLUTION

With SALEM, clients can have their legal requirements identified, assessed and updated automatically.

Our expert service covers legislation set out in the UNE-EN ISO 14001, ISO 9001, ISO 20000, ISO 27001, ISO 50001 and OHSAS 18001 standards, as well as the European Commission's eco-management and audit scheme (EMAS).

SALEM is also capable of assessing a company's performance and verifying its compliance.

As global experts in this field, Applus+ can offer a package of complementary services, such as:

- Studies and reports on the impact of regulatory measures on a company
- Studies and reports on the legal status of new markets
- Query resolution by our legal experts
- Legal audits
- Practical training courses

Target customers

SALEM can provide country-specific legal updates in the following fields: the environment, energy efficiency, industrial safety, health and safety at work and food safety and quality.

Key customer benefits

Clients can gain the following benefits from using SALEM:

- Avoidance of fines and penalties arising from non-compliance
- Avoidance of the sheer complexity of keeping up-to-date with the huge volume of disparate legislation
- A permanent legal-consulting service
- Legal support in the event of any claims to the public authorities
