

Environmental Consulting Services

Challenges faced by organisations in all business sectors nowadays include: identifying the environmental impact of their activities; understanding and complying with local requirements and best practice; implementing environmental solutions within fixed time frames; and filling vital roles for environment-related projects. As a result, businesses are increasingly seeking specialist external advice on the implementation of 'greener' strategies and production models with a view to minimising the impact of their activities and services on the environment.

THE Applus+ SOLUTION

Applus+ provides a diverse portfolio of environmental-consultancy services all over the world. From landmark environmental, social and health impact assessments (ESHIA's) to local, one-off environmental-management solutions, we leverage our in-depth knowledge and expertise and share best practice with a view to adding value to our client organisations and reducing their risks. Our technical experts can assist with any environmental concern a client may have.

By choosing Applus+ environmental-consultancy services, clients gain access to a diverse team of professionals with expertise in multiple industries who can serve at all operational levels. Our experts are well placed to draw on our company's extensive global resources to satisfy local needs.

Our expertise includes, but is not limited to, the following services:

- Environmental baseline studies (air quality, noise, soil, etc.)
- Management plans
- Emergency response plans
- Environmental monitoring

- Spill-response and remediation plans
- Aspect and impact studies
- Due-diligence reviews
- Environmental, social and health impact assessments (ESHIAAs)
- Soil and groundwater assessments
- ISO 14001 environmental management system auditing and certification

We support clients in demonstrating their environmental compliance with regulatory requirements for ESHIAAs, construction/operational environmental-management plans (EMPs), consent-to-construct (CTC) or consent-to-operate (CTO) applications or any other environmental obligations that they may need to fulfil.

Target customers

Protecting and sustaining the environment is a key concern of all industries worldwide.

Key customer benefits

Benefits of choosing Applus+ environmental-consultancy services include:

- Compliance with current environmental legislation
- Support with regulatory formalities
- Verification of the condition of installations, control systems and working environments that could negatively affect employee health, thereby reducing risk

Applus+ can also provide the training necessary for clients to develop in-house competency in the identification, evaluation and control of risks in the workplace going forward.
