

Certification of Person

THE Applus+ SOLUTION

Applus+ Velosi's primary goal is to improve the safety of cranes and lifting equipment operations. Its mission is to develop effective performance standards for those who work with and around cranes; to provide fair, valid, and reliable assessments of knowledge and skills; and to serve as an authoritative industry resource of relevant information. In line with this, Applus+ Velosi administers written and practical examinations to certify lifting equipment operators and riggers all across the Middle East. The company's Certification of Persons Centres complies with International Standards on the matter and any specific requirements issued by local government authorities.

Through this, Applus+ Velosi continues to provide a thorough, independent assessment of the knowledge and skills required to work safely. This enhances lifting equipment safety, reduces workplace risk, improves performance records, stimulates training, and gives due recognition to the professional skills required for Crane Operators, Forklift Operators and Riggers.
