

Environmental Consulting Services

Environmental consultancy services for regulatory and sustainability challenges

Organizations seeking **environmental consulting services** face increasing pressure to meet regulatory demands, manage ecological risks, and adopt sustainable practices. Companies need expert guidance to adapt to evolving standards, from identifying the right [environmental solutions](#) to conducting detailed **impact assessments** and understanding **how to comply with environmental regulations**. The **best environmental consulting firms** offer comprehensive support for responsible operations and long-term sustainability.

THE Applus+ SOLUTION

Applus+ provides a broad portfolio of **environmental consulting services** designed to address regulatory requirements, risk management, environmental impact assessments, and sustainable practices.

Environmental Impact Assessments

From large-scale [environmental, social and health impact assessments \(ESHIA\)](#) to localized sustainability-driven solutions, we deliver tailored **environmental solutions** that help companies meet their **regulatory obligations**, reduce ecological risks, and improve operational practices. Drawing on decades of expertise, we promote best practices that add measurable value. Our multidisciplinary teams are prepared to address a wide range of compliance and sustainability challenges.

Sustainable Development Strategies

By partnering with Applus+, clients gain access to cross-sector experts in **sustainability consulting, regulatory compliance consulting, and environmental risk management**. Our teams operate effectively at all levels, from local projects to multinational programs, drawing on Applus+'s global resources to deliver results that meet both international and regional standards.

Custom Environmental Solutions

Our expertise includes, but is not limited to, the following services:

- **Environmental baseline** studies ([air quality](#), noise, [soil](#), etc.)
- [Environmental monitoring](#)
- [Emergency response plans](#)
- Management plans
- Spill-response and remediation plans
- Aspect and impact studies
- Due-diligence reviews
- [Environmental, social and health impact assessments \(ESHIA\)](#)s
- Soil and groundwater assessments
- **ISO 14001 certification** support and environmental management system audits

Regulatory Compliance and Permitting

We also support clients in demonstrating their **environmental compliance** by preparing documentation for ESHIAs, construction and operational environmental management plans (EMPs), and consent-to-construct (CTC) or consent-to-operate (CTO) applications, as well as other statutory environmental obligations. Through this work, we reinforce our position as a trusted provider of **environmental due diligence for businesses** and strategic **habitat conservation services**.

Target customers

Industry Expertise Across Multiple Sectors

Applus+ provides specialised support to companies operating in sectors where environmental and regulatory demands are particularly high. Our **consulting services** are especially valuable to industries such as **energy, construction, transportation, manufacturing, and extractives**, where **risk mitigation, licensing, and sustainability strategies** are critical to operational continuity.

Commitment to Sustainability and Compliance

We work with organisations seeking to **improve their environmental performance**, comply with **local and international regulations**, and **implement long-term sustainability plans**. Whether expanding operations, planning infrastructure projects or enhancing compliance

programs, Applus+ offers **tailored expertise** to support business goals and strengthen **environmental responsibility**.

Key customer benefits

Why choose us?

Choosing Applus+ means partnering with a trusted expert committed to delivering measurable value through specialised services in sustainability and regulatory alignment. Our solutions are designed to meet legal requirements related to environmental performance, reduce exposure to risks, and strengthen corporate responsibility strategies.

Clients benefit from:

- Strategic guidance on **how to comply with environmental regulations** in complex operational environments
- Independent assessments and audits aligned with international standards, such as **ISO 14001 certification**
- Improved workplace health and safety through verification of infrastructure and control systems
- Comprehensive support with permits, documentation, and reporting to ensure full **regulatory compliance**
- Increased resilience through tailored programs in **ecological risk management**

Data-Driven Monitoring and Risk Management

In addition, Applus+ provides targeted training to help internal teams build long-term capabilities in risk prevention, sustainable operations, and compliance strategy. This proactive approach allows companies to reduce their reliance on external audits while reinforcing leadership in sustainability.
