

IRATA Rope Access Refresher Training Course

Applus + is one of the leading industrial, access and safety training companies in Scotland. The Applus + Training Centre in Grangemouth, Central Scotland, has one of the largest training schools in the UK. We are IRATA, IOSH and Quasafe accredited and our experienced trainers bring a wealth of knowledge and experience to enhance the training experience for all delegates. Bespoke access training courses can also be provided with training being carried out at clients' sites when required. Contact us to discuss your training requirements and arrange and book your course. We provide access training, industrial safety training as well as many other courses • Work at Height Training • Confined Space access training • Rope Rescue Training • Fire Warden Training

THE Applus+ SOLUTION

The length of training will be dependent upon assessment by our trainer. For Level 1 technicians the refresher course will include all techniques covered in the initial course. Levels 2 and 3 will concentrate on rigging and rescue procedures.

2 days refresher training, £80 + VAT per day, our instructor will assess the level of refresher training required and advise.

This may be between 1-4 days depending on the current position of the candidate, previous experience and length of time from last having used their valid certification.

Refresher training can be carried out any day throughout the training week.

Please contact Applus for more information.

Target customers

Due to the aptitude and the mental conditioning that are required for exposure to height, rope access technicians who have not been engaged in rope access work for 6 months or more are required to attend a suitable refresher course before being allowed to work.
