Remarks:

Approved procedures serve as general guidelines for standard applications. For applications that fall outside the scope described in the procedures, such as unique configurations, specialized equipment setups, additional technical documentation may be necessary. The additional documentation could include technique sheets, scan plans, or other relevant materials that provide detailed instructions for the specific application.

It is the responsibility of the supervisor to decide whether the approved procedures sufficiently cover the intended application. If gaps are identified, appropriate supporting documentation shall be developed and reviewed prior to the inspection.
